

ESG EXECUTIVE AUDIT REPORT

Scope 3 supplier emissions inventory

Apex Manufacturing | Reporting period: CY 2025 | Inventory status: calculated

1. Executive inventory summary

Apex Manufacturing has calculated Scope 3 emissions across **6 supplier nodes** for calendar year 2025. The current inventory is **285,447 kg CO2e (285.45 tCO2e)**. All totals are produced by the documented activity-times-factor carbon engine.

TOTAL CO2E	TIER 1 SHARE	SUPPLIER NODES	DATA COVERAGE
285.4 tCO2e	60.2%	6	100.0%

2. Categorical audit breakdown

EMISSION CATEGORY	KG CO2E	TCO2E	SHARE
Energy	73,520	73.52	25.8%
Transport	8,699	8.70	3.0%
Material	199,170	199.17	69.8%
Manufacturing	3,440	3.44	1.2%
Logistics	618	0.62	0.2%

3. Priority supplier hotspots

RANK	SUPPLIER	FOOTPRINT	RISK
#1	SteelCo India	89.85 tCO2e	HIGH
#2	AluCo Extrusions	82.14 tCO2e	HIGH
#3	Plastix Components	43.16 tCO2e	HIGH
#4	Cementa Works	41.78 tCO2e	LOW
#5	Deccan Quarry	20.72 tCO2e	LOW

4. Top actionable reductions

**Switch AluCo to recycled aluminium**Potential reduction: -53.9 tCO₂e**Move SteelCo off coal grid**Potential reduction: -39.0 tCO₂e**Switch SteelCo to recycled steel**Potential reduction: -36.2 tCO₂e

Calculation note. Official inventory totals use the Carbonix deterministic activity-times-factor engine. Model-assisted activity values, where present, are labeled in the source inventory; recommendations are ranked separately from the official calculation.
